WORK EXPERIENCE

Business Analyst

IBM

May 2023 - current / Bangalore

- Conduct in-depth analysis of client's business process, systems, and objectives to identify improvement opportunities and develop effective IT solutions.

- Collaborate with clients together and document business requirements, ensuring they are clear, complete, and aligned with project objectives.

- Analyze and translate business requirements into technical specifications, ensuring they are comprehensive, accurate and feasible for development teams.

- Work closely with project managers, software architects and developers to ensure the successful implementation and delivery of IT solutions.

Business Analyst

Standard Chartered Global Business Services

January 2022 - May 2023 / Bangalore

- Understand business requirements and translate into quality technology solutions.

- Proactively engage, manage, and build strong relationships with both business and technology stakeholders.

- Provide ongoing support to the technology teams as required authoring / reviewing test cases, closing out open issues, questions managing change request process.

- Delivery focused, committing to specific tasks, and ensuring these and overall projects deadlines are met.

PROJECTS

E-Commerce Shopping Website

- Developing a cool E-commerce webpage via HTML, CSS, and JavaScript.

- Building the design and lot of functionality like add to cart, search filter and payment page.

- In this project I am using HTML, CSS, and JavaScript.
